

Human Leadership in an AI World

This keynote & workshop are designed to equip current and aspiring leaders with understanding of the essential skills and insights needed to thrive in an increasingly technology-driven workplace. This interactive and forward-thinking workshop challenges participants to harness the power of Generative AI and other new technologies while emphasizing the irreplaceable value of human leadership.

LEARNING OBJECTIVES

- Understand the six particularly human parts of every job – parts that AI will never replace
- Learn how to leverage Gen AI for decision making while retaining critical thinking and accountability
- Augment human skills with AI, rather than viewing AI as a replacement or threat
- Learn how to foster a team/workplace culture that embraces the possibilities that AI advances
- Lead confidently in an AI-integrated world

DELIVERY CUSTOMIZATION

- Designed to impact every level in the organization from individual contributors to the CEO
- Best as a keynote or 2 to 4-hour workshop
- Working Genius® individual participant assessment available for purchase as pre-work

“AI won’t take your job. But, AI will take parts of your job. And if you don’t learn to do the particularly human things that AI will never do, then, you may in fact be without a job.”

-Kassi Rushing
The Future Ready Leader
Keynote & Workshop

Key Topics

- Incorporates the Working Genius® Model to help learners identify their own genius, competencies and frustration – and then to capitalize on their genius as they learn to lead in an AI world
- Builds on the mindset shifts and power skills of The Future Ready Leader
- Gives leaders some practical ways to use Gen AI today as a bridge to tomorrow
